-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1733

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 16-26 and 28-29, drawn to a tire, classified in class 152, subclass 209.18.
  - II. Claims 27 and 30, drawn to method, classified in class 73, subclass 146.
- 2) Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as (a) molding a tire having grooves in the tread *without* modifying the at least one first dimension based on results of a checking step or (b) molding a tire having grooves in the tread *without* varying noise level upon variation of inflation pressure. The process as claimed can be used to make a materially different product such as a tire having only one row of grooves. For example, the process claims fail to require making the tire of claim 16 which has at least one third row of grooves between two lateral rows of grooves wherein there are no intercommunicating paths between the grooves and end portions of the third grooves extend outside the footprint. Claim 27 merely requires "at least one row of grooves". Claim 30 merely requires "a tread pattern".

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different

Art Unit: 1733

product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process such as a process of using the tire under inflation conditions such that an acoustic signal is not generated and/or noise level does not vary. The process for using the product as claimed can be practiced with another materially different product such as a tire having only one row of grooves. For example, the process claims fail to require using the tire of claim 16 which has at least one third row of grooves between two lateral rows of grooves wherein there are no intercommunicating paths between the grooves and end portions of the third grooves extend outside the footprint. Claim 27 merely requires "at least one row of grooves". Claim 30 merely requires "a tread pattern".

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3) A telephone call was made to Lawrence Galvin on 12-19-02 to request an oral election to the above restriction requirement, but did not result in an election being made.

4) Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5) Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven D. Maki whose telephone number is 703-308-2068. The examiner can normally be reached on Mon. - Fri. 7:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Ball can be reached on (703) 308-2058. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
